

MUHAMMAD SAQLAIN DANISH

.NET Full Stack Developer | AI-Augmented Development | C# · ASP.NET Core · SQL Server

✉ saqlaindanish666@email.com | ☎ +92-317-7146721 | 🔗 [linkedin.com/in/saqlain-danish](https://www.linkedin.com/in/saqlain-danish) | 📁 github.com/saqlaindanish | 🇵🇰 Pakistan

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering graduate hands-on experience building full-stack web applications using ASP.NET Core MVC, C#, and SQL Server. Developed an end-to-end e-commerce platform as a Final Year Project and continued self-driven learning by building additional .NET projects. Passionate about leveraging AI-assisted development tools (GitHub Copilot, Claude, ChatGPT) to accelerate delivery and write cleaner code. Eager to contribute to a forward-thinking team as a Junior .NET Developer or Software Engineering Intern.

TECHNICAL SKILLS

Languages & Frameworks: C#, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, LINQ, HTML5, CSS3, JavaScript (ES6+), Bootstrap 5

Database & ORM: Microsoft SQL Server, T-SQL, Entity Framework Core (Code-First & DB-First), SSMS

Developer Tools & IDEs: Visual Studio 2022, VS Code, Git, GitHub, Postman, NuGet Package Manager

AI & Productivity Tools: GitHub Copilot, Claude AI, ChatGPT (for code generation, debugging, and rapid prototyping)

Concepts & Practices: MVC Architecture, RESTful APIs, CRUD Operations, Authentication & Authorization (ASP.NET Identity), Responsive Design, OOP, SDLC, Agile Basics

PROJECTS

E-Commerce Web Application (Final Year Project)

2024

ASP.NET Core MVC · C# · SQL Server · Entity Framework Core · Bootstrap 5 · Visual Studio 2022

- Designed and developed a fully functional multi-page e-commerce platform from scratch as the Final Year Project, covering the complete software development lifecycle.
- Implemented product catalog, shopping cart, order management, and user authentication modules using ASP.NET Identity for role-based access control (Admin/Customer).
- Built a relational database schema in SQL Server with normalized tables for Users, Products, Orders, and Categories; used Entity Framework Core Code-First migrations.
- Integrated search and filter functionality, admin dashboard for inventory management, and responsive UI using Bootstrap 5.
- Achieved project distinction, demonstrating strong command of full-stack MVC development and database design principles.

Task Manager Application

2025

ASP.NET Core MVC · C# · SQL Server · Entity Framework Core · Bootstrap 5 · Visual Studio 2022

- Built a full-featured task management web application with complete CRUD operations — allowing users to create, view, update, and delete tasks through a clean MVC interface.
- Implemented a real-time notification system to alert users of upcoming deadlines and task status changes, enhancing usability and productivity tracking.
- Designed a normalized SQL Server database schema with relationships between Users, Tasks, and Notifications; managed data access through Entity Framework Core.

- Applied ASP.NET Identity for user authentication, ensuring each user can only manage their own tasks with proper session and role handling.
- Used AI tools (GitHub Copilot, ChatGPT) to speed up repetitive scaffolding and troubleshoot EF Core migration issues, practicing modern AI-assisted development workflows.

EDUCATION

Bachelor of Science in Software Engineering

Virtual University of Pakistan | CGPA: 3.14 / 4.0

- Relevant Coursework: Object-Oriented Programming, Database Systems, Web Engineering, Artificial Intelligence, Software Design Patterns, Data Structures & Algorithms, Software Project Management.
- Final Year Project: Full-stack e-commerce application — recognized for technical depth and clean code architecture.

CERTIFICATIONS & CONTINUOUS LEARNING

- Actively building and maintaining personal .NET projects hosted on GitHub to demonstrate real-world development skills.
- Completed self-paced learning on ASP.NET Core, C# advanced topics, and Web API development through Microsoft Learn and YouTube (freeCodeCamp, Kudvenkat).
- Exploring AI-integrated development workflows including GitHub Copilot, prompt engineering for code generation, and automated testing using AI assistance.
- Working knowledge of Agile methodology, version control (Git/GitHub), and collaborative development best practices.

KEY STRENGTHS

- ✓ **Fast Learner & Self-Starter** — Independently built multiple .NET projects beyond academic requirements.
- ✓ **AI-Augmented Developer** — Integrates modern AI tools to code smarter and faster.
- ✓ **Problem Solver** — Proven debugging and analytical skills from complex FYP development.
- ✓ **Clean Code Advocate** — Follows MVC separation of concerns and maintainable coding practices.

Open to full-time junior roles, internships, and remote/on-site opportunities across Pakistan • Available immediately
